

# WINDSCREEN CRACKS AND CHIPS

How often has a stone shot onto the windscreen of your vehicle caused an unsightly chip or crack? If left unattended, these chips and cracks can not only worsen but will impair your vision when driving. It is always advisable to repair a windscreen chip as quickly as possible in order to prevent further contamination and reduce the possibility of cracks and runs.

## WHEN CAN WE REPAIR YOUR WINDSCREEN?

Any chip that is not larger than 16mm in diameter can be repaired and any run not longer than 100mm can be repaired. We consider up to 4 chips and 2 cracks safe to repair. You will be advised if we feel that the damages are not safe to repair.
