

Body Maintenance Solutions's Benefits in Detail

ODOUR ELIMINATOR

Even with the extreme evolution of cars over the past couple of decades, the lingering smell of foul odours is still a major annoyance to drivers and passengers alike. By making use of a specialized treatment, our expert technicians can eliminate unwanted odours.

WHAT ODOURS CAN BE REMOVED?

Our specialised system can remove odours caused by pets, tobacco and mouldiness. This system is not advisable for extreme odours caused by wet carpets or upholstery, dead animals, rotten food or liquid spills. For extreme odours such as these we recommend that a full valet be performed (at your own cost). If any odours still exist after a valet is done, our Odour Eliminator is advised.
