

# PAINTLESS DENT REMOVAL

Unightly dents caused by vehicle doors opening on your vehicle or even shopping carts making their way into your vehicle can easily be repaired, without affecting the original factory paint coat. With the use of specialized tools, our expert technicians can remove any dent size within a 30mm diameter on which this specific technique is required.

## WHEN WILL THIS TECHNIQUE BE USED?

This technique will be used on any dents within the 30mm diameter where there is no damage to the paint coat and where the metal is not stretched. In instances where the metal is stretched or the paint coat is damaged, traditional auto body repair is advised. Hail damage does not fall within the benefit specification.
