

# MAG WHEEL & WHEELCAP REPAIRS

With the deteriorated road conditions, South African road users are more frequently experiencing damage to their mags and wheel caps. BMS allows an annual Mag Wheel and Wheel Cap Repair to the maximum value of R800 (incl. VAT).

If the damage exceeds the amount specified in the Limits section, it will not be covered by this policy. This benefit covers Balancing, Tubeless Valves, and refitment. Realignment and damage to the tire itself are not covered. Please provide us with two quotations for the repair work.
